

“Looking through the Telescope”

2 day workshop with Dr Steven Walker, Brief Therapy Solutions

This two day *highly interactive workshop* will provide the opportunity for participants to interact with aspects of a child’s life from birth to 18 years through the lens of child protection and child development. The workshop will also explore elements of early intervention, child development and family dynamics, their impact on family life and the development of long term serious challenging behaviours in children.

Participants will explore:

Impacts on child development that include attachment problems, mental health, genetics, domestic violence and substance use

The impact of parenting styles on a child’s long term coping capacity

The emergence and escalation of child social and emotional deficits

Early intervention, cumulative risk and child protection

Challenging Behaviours – The relationship between individuals, parenting and their environment

Cost: Please contact Sector Connect for current fees

Please note that to run this 2 day workshop there MUST be a minimum of 30 participants registered.

A late cancellation fee applies and will vary between 7, 14 and 21 days notice
